

**2005 New!**

**#9-10LA Evolution Model**

The design is the same as the LA model.  
This is the evolution model of the large arbor series  
which was designed so that neither dust nor sand  
may go into the inside as much as possible.  
This has the strongest body, due to no hole.  
¥58,000

Weight: 9.7oz Capacity: WF8F & 200yds of #30

**#9-10LA / 11-12LA Engraving Reel**

It's possible to engrave names on the surface of the spool.  
The maximum number of letters are 18.  
Will you make the only one reel in the world?  
Additionally, it's possible to engrave a kind of illustration also.  
If you want more details, please feel free to ask us.

# Saltwater Series

The Saltwater series, equipped with a specifically designed smooth and powerful drag system, was created to handle large fish. With this sophisticated drag system, which controls the line tension, if your near-catch suddenly breaks free, you are able to fish without cutting the tippet. In addition, to combat any difficulty in rolling the line when hooking a fish, the WELLSTONE reel rolls up to the spool frame fast and swiftly, ensuring that no catch is lost. For a successful catch, every time, try WELLSTONE today.

The reel price includes the white grease for foreign countries.

**#7-8 FULL-LINE** ¥36,800

Designed to handle large fish- large trout, dolphin fish or bonito. This reel can be used for both large trout fishing and light saltwater applications.

Dia: 3.340 Wid: 0.90 Wt: 6.90
